

**U3APT<sup>®</sup>**

**J-ARM**  
*auto*

It's a no-compromise solution built from battlefield experience to provide a rock-solid, versatile, and dependable connection between your night vision and your helmet mount.

This is the last J-arm you will ever need to buy.

## BUILT FOR REAL-WORLD CONDITIONS

Standard-issue plastic J-arms are a known point of failure.

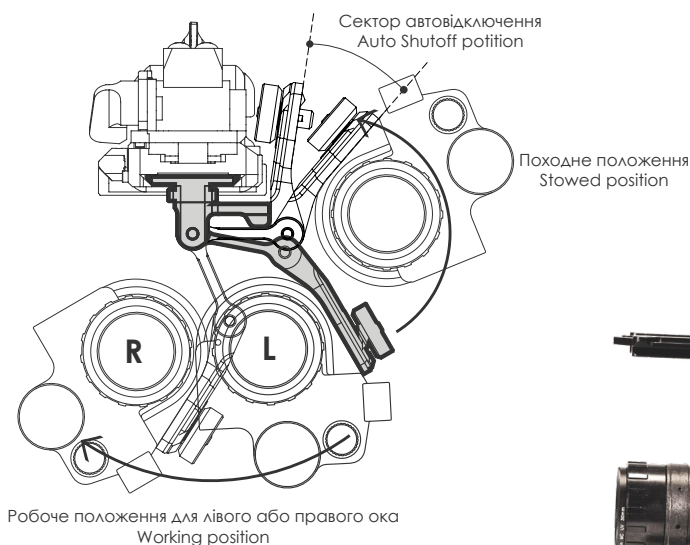

Cheap metal copies are rigid and can transfer dangerous impact forces directly to your neck.

Our design is different. Forged in the demanding environment of Ukraine, this J-arm uses premium materials and an articulating design that not only survives impacts but helps protect you and your expensive equipment.

## AT A GLANCE

- **Zero Wobble:** Our adjustable dovetail shoe interface creates a tight, secure fit with any dovetail-style mount, eliminating annoying play.
- **Rock-Solid Construction:** Machined from 7075 aluminum with titanium joints, it is built to endure the harshest conditions without fail.
- **Intuitive Articulation:** Swing the monocular away or switch between eyes with a single, fluid motion. No complex buttons or releases.
- **Compact Stowed Profile:** The dual-joint design allows the PVS-14 to sit snugly against the helmet when stowed, preventing snags.
- **Built-In Safety:** Articulating joints absorb impact energy, protecting both the device and the operator from injury, a feature absent in rigid J-arms.

## ATTENTION TO DETAIL

- **Perfect Eye Placement:** Two adjustable joints provide an unmatched range of adjustment for perfect alignment and comfort.
- **Gas Mask Ready:** The central section can be flipped to increase eye relief by 10mm for use with protective masks.
- **Bungee Integration:** A dedicated loop allows you to use your helmet's bungee cords to further stabilize the entire system.
- **Reduced Back-splash:** The offset mounting point brings the monocular closer to your face, improving light discipline.

### Compatible NVGs:

- AN/PVS-14

### Compatible mounts:

UDAPT F25, Wilcox G22, G24, G30, G37, G69, G70, Norotos AKA2, INVG, LoSto and other with dovetail socket
